Slab template · For your home

Wavy Mirror Frame

Intermediate · approx. 1.5 hours

Frame approx. 15.5 cm · mirror 10 cm

A round mirror in a soft, wavy frame: simple enough for the hallway, playful enough for the bathroom. A ring on the back holds the mirror and a little bridge hangs on a nail. Handmade from stoneware clay in about 1.5 hours.

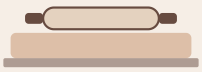

You will need

- Stoneware clay (approx. 500 g)
- Rolling pin & 2 guide sticks (5 mm)
- Knife or craft knife
- Sponge & slip (liquid clay)
- A pencil as a support
- Round mirror, 10 cm across & mirror glue

Printing

Print the templates at full size (100 %, “Actual size”), never “Fit to page”. Page 4 is landscape. The test square must measure exactly 5 × 5 cm.

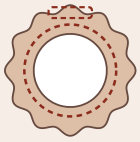

How it works

1 Roll the clay 5 mm thick between the guide sticks.

2 Cut out frame A and the circle in the middle. Smooth the waves.

3 Turn the frame over. Trace the ring and bridge through the paper with a needle.

4 Cut out strips B. Scratch the ring line (score), add slip, stand the strips on edge.

5 Lay bridge C over a pencil at the top and press the ends on: your hanger.

6 Dry, fire and glaze. Glue the mirror into the ring on the back.

Tip

Clay shrinks by about 10 %. The template is made for a mirror exactly 10 cm across.

Tip

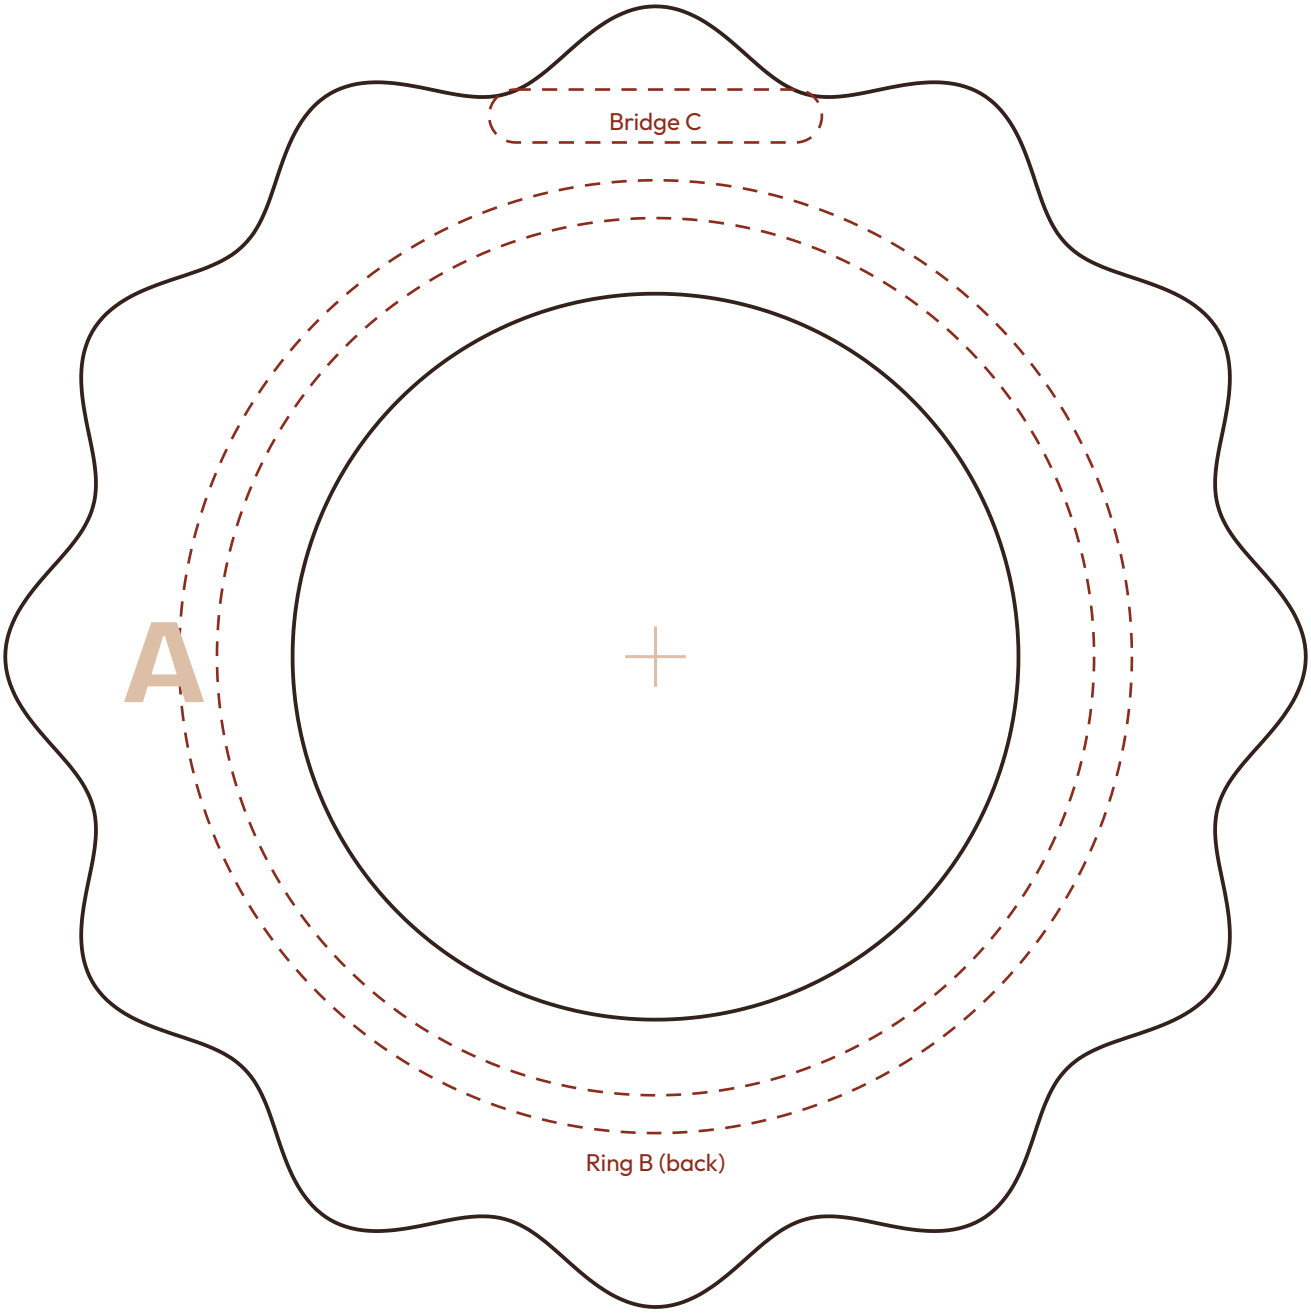

Lay a small board on top while it dries to keep the frame nice and flat.

Tip

For a pattern, roll a lace doily into the clay before you cut.

Template A · Frame

Cut along the outside and the inside. Dashed red: on the back, this is where the ring (strips B) and bridge C go.

Test square 5 × 5 cm

Templates B & C · Ring and hanger

Cut strip B twice and join the two into a ring on the back. Simply trim off anything that is too long.

Lay over a pencil

Test square 5 × 5 cm
