Yarn Bowl

Medium · approx. 2 hours

Ø approx. 13 cm, 10 cm tall

A bowl for your ball of yarn, with a wavy rim and a curved slot for the thread. The ball stays put, the yarn runs smoothly. Made in about 2 hours from stoneware clay.

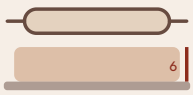

You will need

- Stoneware clay (approx. 1.2 kg)
- Rolling pin & 2 guide sticks (6 mm)
- Knife or craft knife
- A drinking straw for the hole at the end of the slot
- Sponge & a little liquid clay (slip)
- A tin or jar, Ø approx. 12 cm, wrapped in newspaper

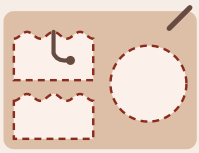

Printing

Print the templates at full size (100 %, “Actual size”), never “Fit to page”. Page 3 is landscape. The test square must measure exactly 5 × 5 cm.

How it works

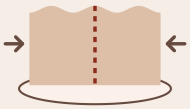

1 Roll the clay 6 mm thick between the guide sticks and smooth it.

2 Cut out base B and wall A twice. Cut the slot into one wall piece only, punch the hole with the straw.

3 Let the wall pieces firm up for 15–20 min. Score the short edges (scratch them) and add slip.

4 Wrap both pieces around the tin, stand them on the base and press the seams together firmly.

5 Press a thin coil of clay into the inside edge of the base, blend everything. Smooth the slot with a damp sponge.

6 Remove the tin, dry slowly under loose plastic, then fire. Add your yarn, thread through the slot!

Tip

Smooth the edges of the slot really well, otherwise the yarn will catch.

Tip

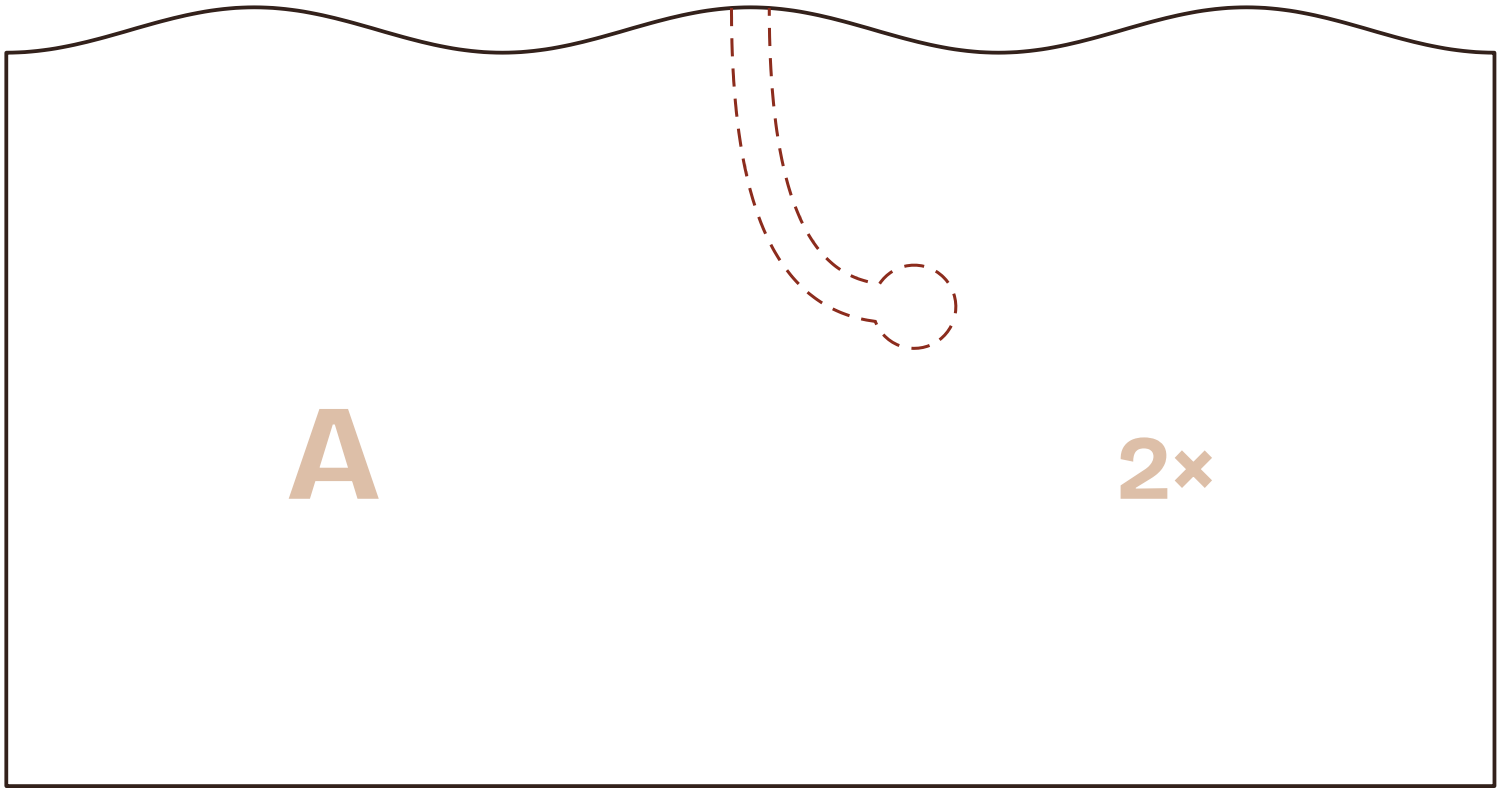

The 6 mm base adds weight: the bowl won’t wander when you pull the thread.

Tip

The waves on both wall pieces line up exactly. Join them so that dip meets dip.

Template A · Wall (2×)

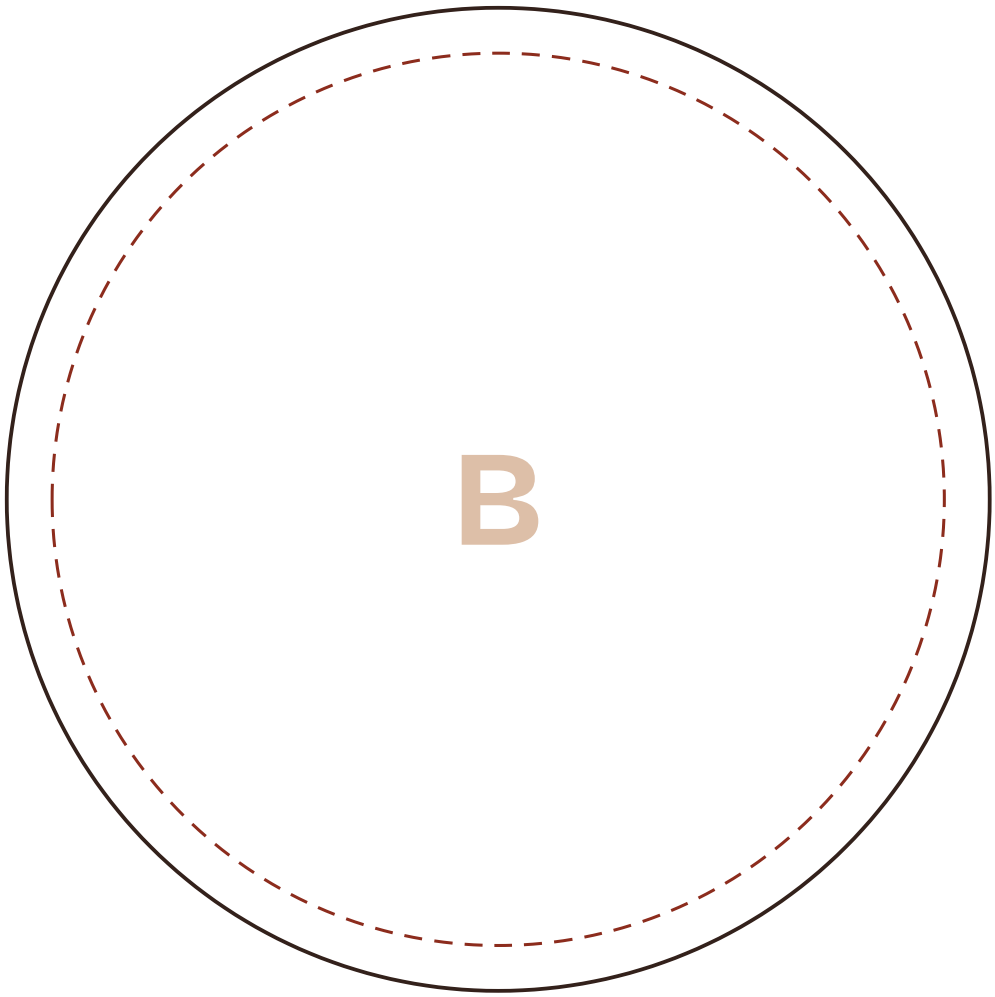

Cut out twice. Dashed red: the yarn slot, cut it into one of the two pieces only.

Test square 5 × 5 cm

Template B · Base

The wall stands on the rim, between the outer circle and the dashed line.

Test square 5 × 5 cm
