Slab template · Halloween

Witch Hat Lantern

Medium · approx. 2 hours

approx. 14 cm wide, 13 cm tall

A wonky witch hat with a wavy brim and little stars that let the light sparkle through. Simply place it over a tealight.

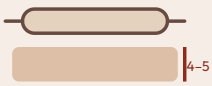

You will need

- Clay (approx. 600 g)
- Rolling pin & 2 guide sticks (4–5 mm)
- Needle tool or craft knife
- Drinking straws in two sizes
- Slip & sponge
- Paper and tape for a support cone

Printing

Print the templates at full size (100 %, “Actual size”), never “Fit to page”. The test square must measure exactly 5 × 5 cm.

How it works

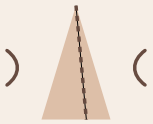

1 Roll out the clay 4–5 mm thick and smooth it.

2 Cut out cone A and brim B.

3 Punch the stars and dots in the cone with a straw or needle.

4 Wrap the cone around a paper cone and close the seam over the tab with slip.

5 Set the cone onto the brim and blend. Bend the tip slightly, wave the brim.

6 Let it dry, fire, place it over a tealight and enjoy!

Tip

Remove the paper cone only once the clay is leather-hard.

Tip

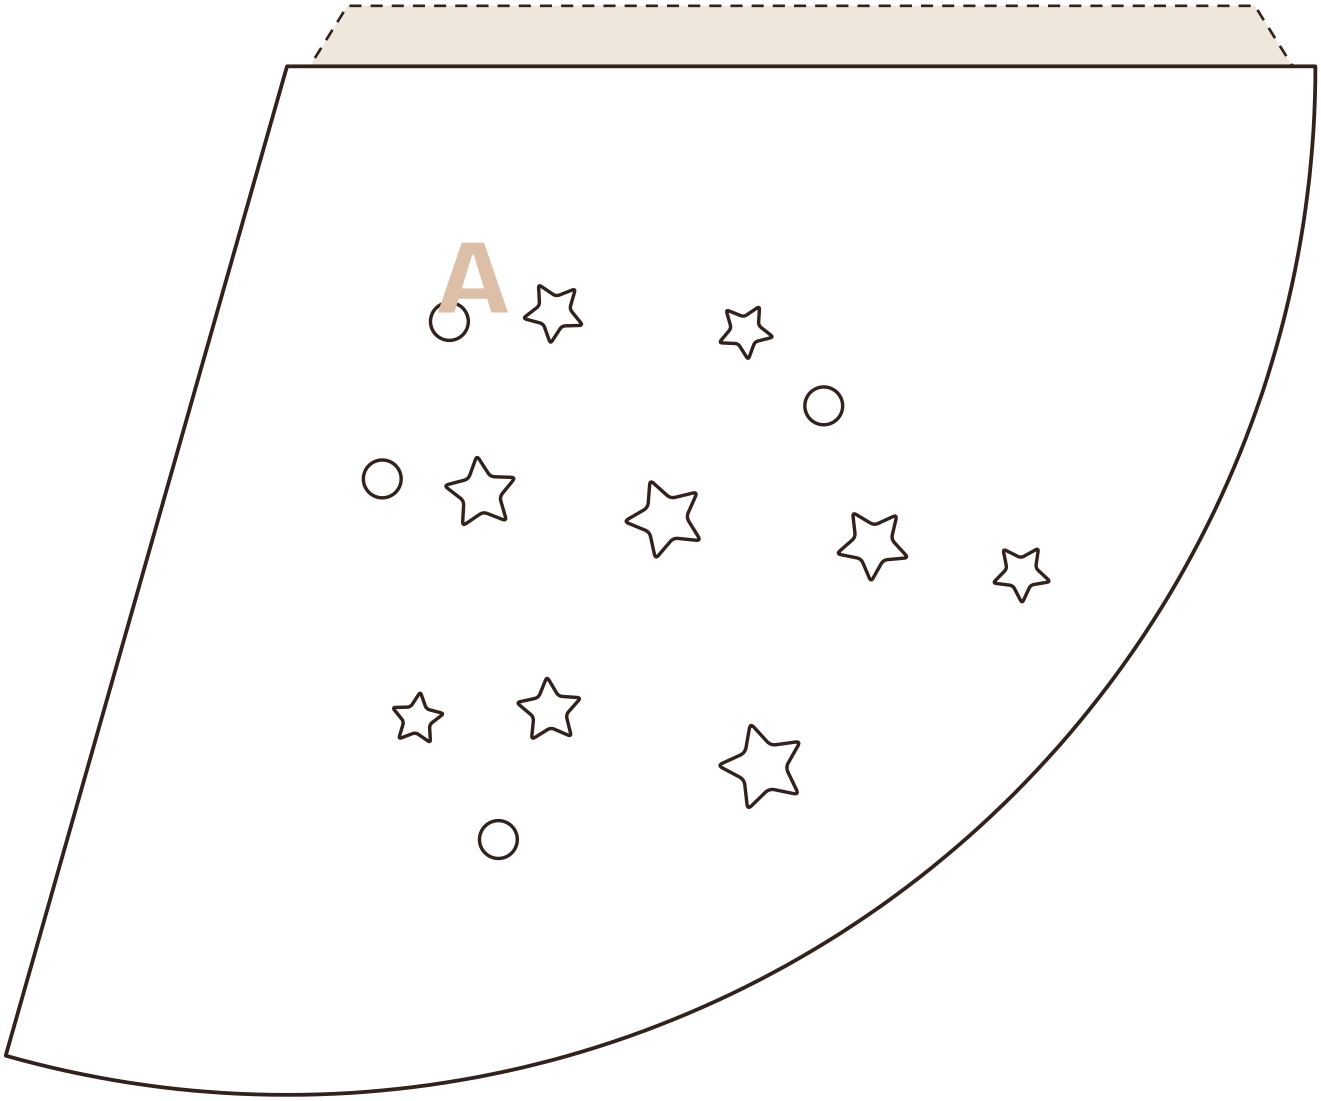

Keep the holes away from the seam, that is where the hat needs strength.

Tip

Stoneware with a real tealight. Air-dry clay: use with an LED tealight only.

Template A · Hat cone

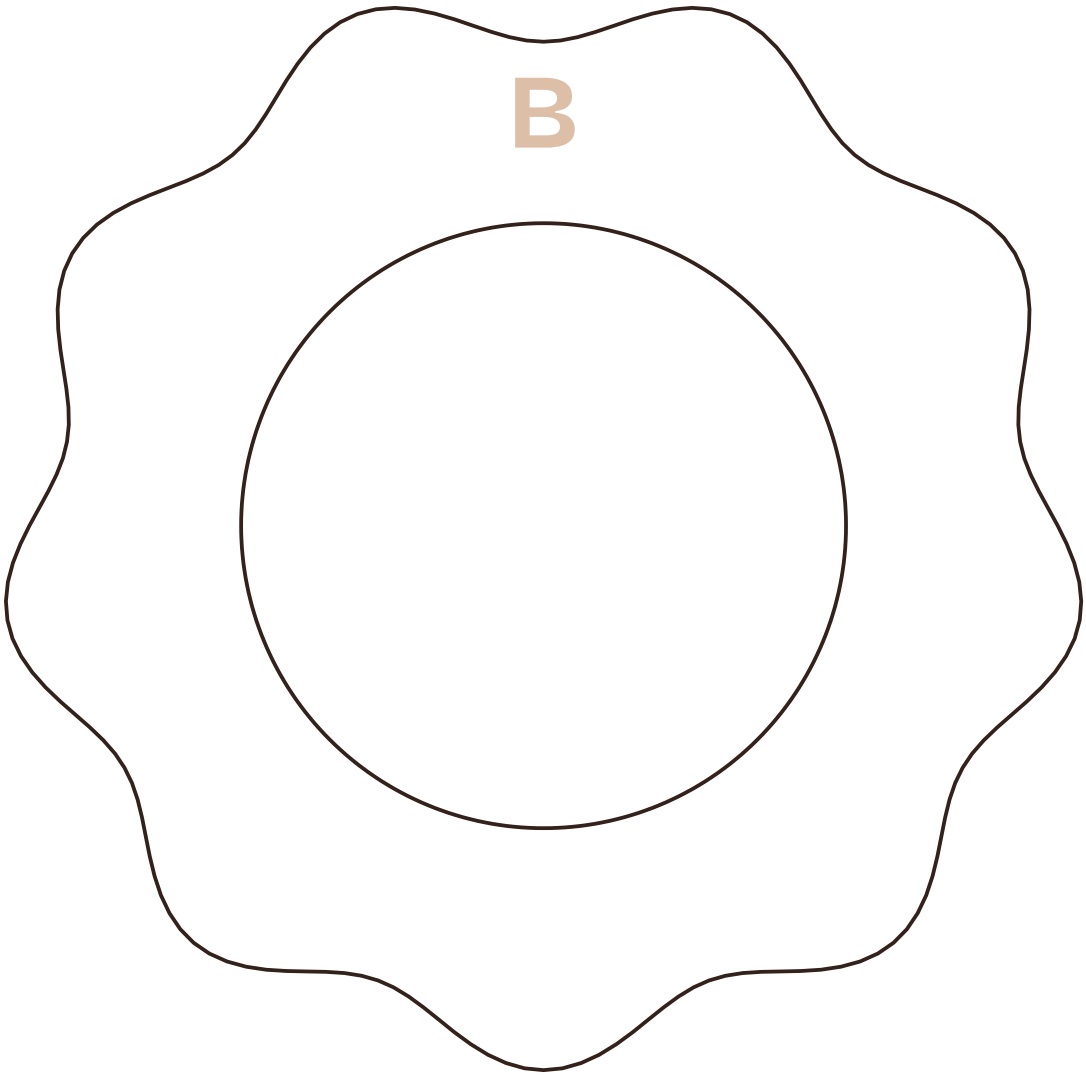

Cut along the solid line. Grey: tab for the seam. Stars and circles: punch out.

Test square 5 × 5 cm

Template B · Brim

Cut out the inner circle, that is where the cone sits. Shape the wave freely.

Test square 5 × 5 cm
